Results: the main answers on one page

Every number is a live link to the model sheets. Nothing here has been tested with a practice. Prices are AZN a month per client company, before VAT.

One accounting practice at the launch price	Conservative	Base	Optimistic	Where it comes from
Verdict against the value / price screen	Fails both	Passes only on capacity	Passes on labour alone	Practice ROI
Value / price on labour	1,1x	2,4x	4,7x	Practice ROI
Value / price on capacity	0,6x	2,8x	8,1x	Practice ROI
Share of all client hours saved (proof bar 30%, kill line 15%)	14,6%	27,9%	42,6%	Practice ROI

Price per client, AZN a month	Conservative	Base	Optimistic	Where it comes from
Year 1: launch price from the tiers and client mix	14,50	14,50	14,50	Agent platform
Year 2: launch price + modules	16,00	17,50	21,48	Agent platform
Year 3: launch price + modules	17,50	22,98	30,93	Agent platform
Value / price on labour at the year-3 price	0,9x	1,5x	2,2x	Practice ROI, counting no module value
Value / price on capacity at the year-3 price	0,5x	1,8x	3,8x	Practice ROI, counting no module value

Cash and funding	Conservative	Base	Optimistic	Where it comes from
Paying practices after 36 months	26,9	81,3	196,4	Cash model
Annual recurring revenue after 36 months, AZN	112.854	741.364	3.643.801	Cash model
Cash at month 36, AZN	-21.070	197.454	1.457.420	Cash model
Extra funding needed within 36 months, AZN	21.070	0	0	Cash model
Month cash runs out	36	45	Not in 60 months	Cash model
First profitable month	Not in 60 months	Not in 60 months	25	Cash model, with the revenue-step hires
First profitable month with core and support only	Not in 60 months	Not in 60 months	20	Cash model, without those hires
Funding needed to first profit, AZN	Not reached	Not reached	0	Cash model
Extra funding needed within 60 months, AZN	981.472	313.736	0	Cash model

Unit economics, base case	Launch price	Year-3 price	Where it comes from
Revenue per client, AZN a month	14,50	22,98	Startup P&L
Gross margin	61%	71%	Startup P&L
Break-even practices, team of 12	364	189	Startup P&L, before the dealer share
Break-even practices, team of 12, with the dealer share	448	224	Startup P&L
Self-funding break-even, practices	267	119	Startup P&L, team pays for itself
Self-funding team, people	13	9	Startup P&L

Stress and ceiling	Value	Where it comes from
Launch gross margin at a reading cost of 0.03 USD a page	24,5%	Stress tests
Launch gross margin at a reading cost of 0.05 USD a page	-11,5%	Stress tests
Break-even practices at a 70 / 25 / 5 client mix, launch price	534	Stress tests
Break-even practices at an 80 / 18 / 2 client mix, launch price	719	Stress tests
Azerbaijan realistic ceiling, USD a year	2.353.002	Unicorn math, base year-3 price

Azerbaijan realistic ceiling as a share of the $1B target	2,4%	Unicorn math

Still unknown: clients per practice, client mix, accountant pay, price per client, module take-up, and reading accuracy on real receipts. The practice interviews and the receipt test decide these.
Founder to confirm: e-invoice matching stays inside Books, the module prices and take-up on Agent platform, and support pay on Startup P&L.

Path to $1B: the steps, and what must be true on each one

An illustration of what would have to happen, not a forecast. Yellow cells are inputs. Steps 1 and 2 read the Base case of the Cash model; steps 3 to 5 are what you would need to believe.

Step	By when	Paying practices	Clients per practice	Client firms	Revenue per client, AZN a month	Annual revenue, USD	Multiple of revenue	Value at that multiple, USD	Value at the price per client below, USD	Team	Capital raised by then, USD	What must be proven to climb
0. Prove it: Azerbaijan	First 90 days	3	30	90	0,00	0	0x	0	270.000	3	882.353	Reading accuracy on 200+ real receipts. 30% of client hours saved. Three practices agree to pay. Overdue invoices measured at 30 firms. Written legal answer on payments.
1. Books live: Azerbaijan	Year 1	13	30,0	403	14,50	41.242	10x	412.421	1.208.820	5	882.353	Practices renew after the free month. Entries approved with few edits.
2. Azerbaijan leader, Cash added	Year 3	81	30,5	2.477	24,95	436.097	10x	4.360.966	7.429.789	10	882.353	Cash adds revenue in real clients. New funding found: the Base case runs out of cash without it.
3. Three countries, money flow live	Year 5	800	30	24.000	35,00	5.929.412	10x	59.294.118	72.000.000	40	10.000.000	Licensed partner live. A second country reaches the same accuracy in under 6 months. The internal builder cuts set-up time.
4. Region: five countries	Year 7	3.000	30	90.000	50,00	31.764.706	10x	317.647.059	270.000.000	120	50.000.000	Money flow earns as much as subscriptions. Local teams work without Baku hand-holding.
5. $1B	Year 10	6.000	30	180.000	80,00	101.647.059	10x	1.016.470.588	540.000.000	250	150.000.000	About Pennylane's number of partner firms, Omie's revenue per client and Omie's client count.

What buyers paid per client: clients NowAI would need for $1B at each price

Company	Value, USD	Clients	Value per client, USD	Clients needed for $1B	As of	Label	Note
Conta Azul (sold to Visma)	300.000.000	100.000	3.000	333.334	Aug 2025	reported	Price from Bloomberg; about 100,000 clients from Visma's release.
Omie (Brazil, pre-money)	700.000.000	180.000	3.889	257.143	2025	reported	Pre-money, mostly a share sale. Sold through accountants.
Pennylane (France)	4.250.000.000	800.000	5.313	188.236	Jan 2026	reported	Valuation from Bloomberg; client count from a deal adviser.
Tide (UK, India)	1.500.000.000	1.600.000	938	1.066.667	Sep 2025	reported	Business accounts for micro firms.
Gusto (US)	9.300.000.000	500.000	18.600	53.764	Jun 2025 / 2026	reported	Tender-offer valuation; rich-market payroll.

Revenue per customer a year: the smaller the customer, the more a company needs money flow

Company	Annual revenue, USD	Customers	Revenue per customer, USD	Money layer?	As of	Label	Note
NowAI, launch price	102	1	102	No	2026	model	Per client firm.
NowAI, Base year 3	162	1	162	Partly	2026	model	Per client firm, with modules.
Omie	109.090.909	180.000	606	Adding one	2025	reported	R$600M a year over 180,000 clients.
Qonto	569.710.000	600.000	950	Yes	2025	reported	EUR 495M, from one French report.
Melio	153.000.000	80.000	1.913	Yes	FY25	reported	Year to March 2025.
Gusto	1.000.000.000	500.000	2.000	Partly	Feb 2026	reported	Cash collected in 12 months, not ARR.
Vanta	300.000.000	16.000	18.750	No	Apr 2026	reported	Compulsory certificate, higher-paying customers.
Slash	250.000.000	5.000	50.000	Yes	Apr 2026	reported	CEO-stated annualised revenue; customer count from one outlet.

USD per E	1,15		
BRL per U	5,50		

Revenue per client in Azerbaijan once money flow is live, AZN a month

Books at the launch price	14,50	link	Reads the tier prices and client mix.
Modules, Base year 3	8,48	link	Cash, Tax, People and Comply as modules.
Yearly sales of an average client, AZN	150.000	assumption	No data. The simplified-tax limit is 200,000.
Share of sales collected through payment links	15%	assumption	Nobody has been asked.
NowAI's share of the collection fee, % of amount	0,4%	assumption	Partner fees are not published.
Supplier bills as a share of sales	70%	assumption	No data.
Share of supplier bills paid through NowAI	15%	assumption	Nobody has been asked.
NowAI's share of the payment fee, % of amount	0,1%	assumption	Partner fees are not published.
Clients a year taking invoice finance through Now	3%	assumption	The skeptic failed Loan-Ready as a stand-alone business.
Average amount financed, AZN	20.000	assumption	No data.
Referral fee, % of amount	1,0%	assumption	Paid-intermediary rules are unread.
Collections, AZN a month	7,50		
Supplier payments, AZN a month	1,31		
Invoice-finance referrals, AZN a month	0,50		
Money layer, AZN a month	9,31		
Total revenue per client in Azerbaijan, AZN a mo	32,29		
Gap to Omie's revenue per client, AZN a month	53,57		Azerbaijan alone does not close this gap. Other countries and larger clients have to.

What Cash is worth to one client: getting paid sooner

Credit sales a year, AZN	600.000	assumption	An example firm, larger than the average client above.
Days sooner the money arrives	15	assumption	No Azerbaijani data on late payment found. The 30-firm measurement tests this.
Interest rate on new manat loans	18,6%	research	Central Bank figure used in the SME research.
Cash freed, AZN	24.658		

Interest saved a year, AZN	4.586
Saved a month / Cash module price	12,7x

CALCULATION KEY

Client firms = paying practices x clients per practice. Steps 1 and 2 read client companies from the Cash model, so clients per practice is derived there.
Annual revenue, USD = client firms x revenue per client x 12 / AZN per USD.
Value at that multiple = annual revenue x multiple. 10x is the middle multiple on Unicorn math. Omie was valued at about 6x its reported revenue, so 10x is not cautious.
Value at the price per client = client firms x Conta Azul's value per client, the most cautious comparison on this sheet.
Team and capital on steps 3 to 5 are assumptions. For scale: DataSnipper had about 130 staff at $1B; Basis raised about $138M to reach $1.15B; Rillet raised more than $200M to reach $1B.
Value per client = value / clients. Clients needed for $1B = $1B / value per client, rounded up. Dates of value and client count can differ by months.
Revenue per customer = annual revenue / customers. Omie and Qonto are converted with the rates in column L. Both rates are round assumptions.
Money layer = collections + supplier payments + invoice-finance referrals, each from the yellow cells. All of these are assumptions until the partner fees and the 30-firm measurement are in.
Gap to Omie = Omie's revenue per client in AZN a month less NowAI's total.
Cash freed = credit sales x days sooner / 365. Interest saved = cash freed x interest rate.
